

BINOD BAJGAI

PYTHON • SQL • BACKEND DEVELOPMENT

Kathmandu, Nepal | +977-9848552200 | bajgaibenod@gmail.com | [linkedin.com/in/binod-bajgai-18562b3a3](https://www.linkedin.com/in/binod-bajgai-18562b3a3) | github.com/bajgaibenod-sketch

PROFESSIONAL SUMMARY

Second-year Computer Science (AI) student focused on backend development with Python, Flask, and SQL. Built EcoTrack, a carbon footprint calculator for individuals and industries, as part of an Agile/Scrum team, including the underlying database design. 1st Runner-Up at Hult Prize Softwarica for Sarathi, a location-discovery concept surfacing authentic local destinations. Seeking a backend development or software engineering internship.

EDUCATION

Bachelor in Computer Science with Artificial Intelligence

Expected 2028

Softwarica College of IT & E-Commerce (affiliated with Coventry University), Kathmandu, Nepal

PROJECTS

EcoTrack — Carbon Footprint Calculator

Team Project

- Built a Flask web application that estimates carbon footprints for individuals and industries from user-submitted usage data, developed as part of a student team using Agile/Scrum methodology.
- Designed and implemented the SQL database schema to store usage inputs, emission factors, and calculated results, structuring the data model to support accurate footprint queries.
- Used GitHub Copilot and Claude during development to speed up debugging and iterate on features faster.

Flask & MySQL CRUD Applications

Coursework

- Built Flask applications implementing full CRUD operations against MySQL databases, applying object-oriented design principles for maintainable, structured code.

TECHNICAL SKILLS

Languages & Frameworks: Python, Flask, HTML, Object-Oriented Programming (OOP)

Databases: SQL, MySQL, database schema design, ER diagrams, data querying

Tools: Git, GitHub, VS Code, MySQL Workbench

Data Visualization: Data visualization basics for reporting on query results

AI-Assisted Development: GitHub Copilot and Claude for debugging and accelerated learning

ACHIEVEMENTS

1st Runner-Up — Hult Prize, Softwarica College

- Co-developed "Sarathi," a map-based discovery concept surfacing authentic local destinations not shown on mainstream apps like Google Maps, positioned as an alternative to relying on local guides; presented the concept as part of a team and placed 1st Runner-Up.
